

# Evervue Wave Remote Control

**It is waterproof, it floats and it works with all IR remote devices.**

Simply copy the codes from your original remote control to the Evervue Wave remote control, then you can use the Evervue Wave remote control to control your equipment from everywhere where water is an issue.

- Program and control up to 3 devices. For example: TV, Blue Ray player, Satellite Box, etc.
- Simply copy the IR signal from your original remote control to the Evervue Wave remote control.
- Use around bath tub or pool area. Moreover, use it outdoors or on your boat.

## How does it work?

1. Position your original remote control head to head to the Evervue Wave remote control.
2. Press the button which indicates the device you want to program, for example TV.
3. Press the "SET" button for 3 seconds, until the red LED light starts flashing.
4. Press the button you want to copy, for example the ON/OFF button on the Evervue Wave remote control.
5. Then press the ON/OFF button on the original remote control, and the signal is being copied to the Evervue Wave remote control.
6. Repeat this with all the buttons you want to copy.
7. When finished, press the "SET" button again, and there you go!

Evervue Wave Remote Control

Original Remote Control

**Note:**

- Only for Infrared (IR) remote controls, not for Radio Frequency (RF) remote controls.
- Do not keep in water for a longer period of time or when not in use.
- Do not remove the battery cover in the water.

- When closing the battery cover, make sure the rubber ring is in the correct position.
- Limited warranty: due to the nature of this product, the warranty is limited to arrival defect only.
