

Step 1 Switch on both your Bluetooth keyboard and TV. Make sure that the Bluetooth feature is turned on in the TV settings.

Step 2 To activate Bluetooth on your keyboard, press and hold the “Fn” and “C” keys simultaneously for a few seconds.

Step 3 If the CAPS lock light turn blue, it indicates that the Bluetooth keyboard is discoverable. Locate the corresponding Bluetooth device in your TV's settings and initiate the pairing process.

If you do not have a Bluetooth keyboard, you can also use a USB input keyboard or the Zepp remote control of the TV as an alternative input method.
