

# Motion De tectio n

## Installation manual

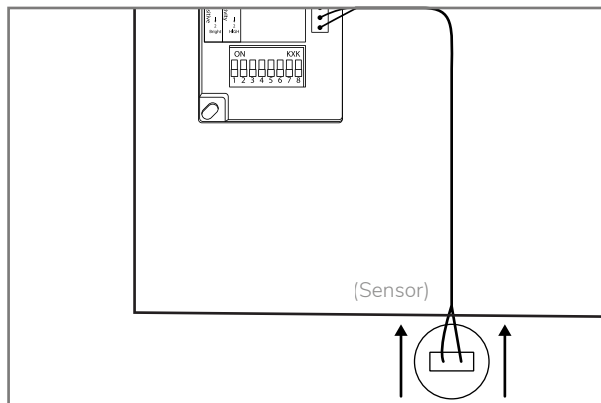

### 1 Check the items after receiving

Before installing, check to ensure that you have received all the package contents.

### 2 Connect the motion detector.

Take the male end of the motion detector and connect it to the mirror's power cord. Then take the female end of the motion detector and connect it to the power supply. Lastly, plug the power supply to the power source.

### 3 Attach the sensor under the mirror

Securely attach the round bulb (sensor) under the mirror.

**ON** **KXK**

1 2 3 4 5 6 7 8

**A** **B** **C**

**(A)**

Phosensitive

1 Dark  
↑  
2 Brightness

This determines your sensor's sensitivity to ambient light. Setting it to dark on a bright environment will make the sensor slow to react to motion.

**(B)**

PIR Sensitivity

1 LOW  
↑  
2 HIGH

This knob determines your sensor's sensitivity. Pulling the knob down will make it extremely sensitive to motion

**(C)**

**Time Delay**

3	4	5	6	7	8
↓	↓	↓	↓	↓	↓

↓	↓	↓	↓	↓	↓

15seconds  
30seconds  
1minute  
3minutes  
5minutes  
8minutes

These buttons determine the length of time the mirror could be idle before it automatically turns off.

### 4 Adjust to your preference

Change the sensitivity as well as the time delay according to your needs.
